Levblockchain LVE Organization Analysis

• Our vision

Our Organization Levblockchain LVE , will help many new, young, passionate people who are trying to work on new technology projects, blockchain projects and products. Many of Geek Developers abandoning because of the country's educational erroneous infrastructure and frozen economic growth.

Our organization Levblockchain LVE together with new developers located in Greece will help each other to develop real and future use of blockchain and adopting it by Projects made by real physical contribution, helping Greek territorial communities of developers and startups.

We hope to become regulated in Greece because there are no regulations about crypto and is not illegal, also government announced that tends to adopt blockchain in the future so we want to be the first formal start-up in Greece and become indexed security organization at Greek stock exchange, at this premature Exchange market.

• Our Token & Tokenized DAO Ecosystem

•Our Token Information & Token purpose

Token Erc20 Name : Levblockchain

Token Symbol : LVE

decimals : 18

Total Fixed supply : 108.000.000

Total Public Selling Supply : 54.000.000

Circulating Supply : 40.000.000

Price 1 LVE : 0.0016 Eth

Soft capital : 16.000 ETH

Hard capital : 43.200 ETH

Token contract :

0xa93f28cca763e766f96d008f815adaab16a8e38b

The fixed supply of token, 40% circulating supply and annual buybacks of 25% from total sold supply of tokens at the rate of 0.0032 Eth for the first year and +interest of 10% every new year will support our Token Levblockchain LVE to avoid inflation and to be properly handled and holded.

DAO, Founders, start-up's team and token bounties will hold the 50% of total token's supply as a long term maturing investment besides that support's our's and contributor's Return of investment ROI as much as Ranking our Token Levblockchain LVE and also our DAO as Valuable and Attractive.

Our organization's funding phases:

Private sales (ongoing-include PayPal payments)

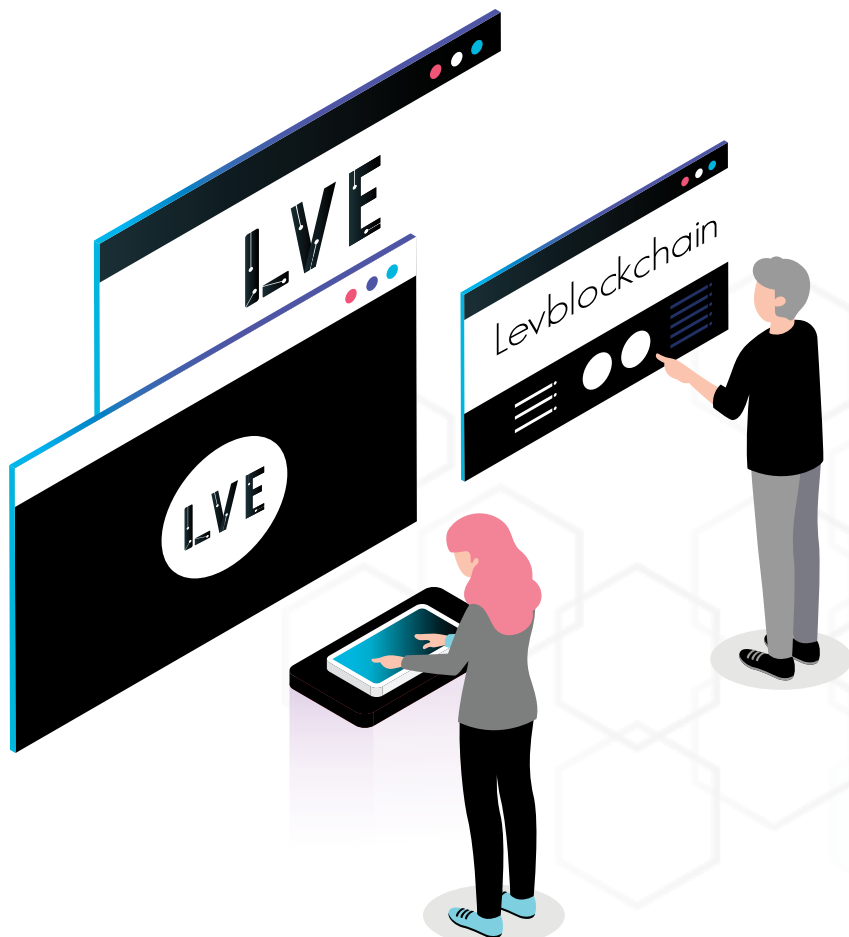

Pre-ICO (upcoming at MAY,discounted pack offers,paid only by Ethereum)

MAIN ICO phase (after Pre-ICO,paid only by Ethereum)

Buy-back smart contract will be published(deployed) before our ICO and once the ICO reach the funding goal ,then the DAO will hold the amount raised from the ICO and send the amount of Eth needed for the first year's buy-back smart contract.

Once the first buy-back smart contract reach the deadline of tokens to be bought back(25% of total tokens sold) or the time limit(14 days) then the new buy-back smart contract will be published (deployed) at 0.0032 Eth price +10% interest rate.

Our token represents the shares(assets)company will hold (ex.Buildings)or pricing of the company tied to growth profits and speculation, also our token used for holders to have voting rights about our organization and ecosystem's opinions and decisions.

• Our Tokenized DAO Ecosystem & Information

Organization's asset holding capabilities: properties, funds holding, investing, holding other asset classes and holding also other DAOs Tokens to have profits, voting rights.

Voting rights for everyone, everything about fundings, withdrawals and decisions.

Transparency will be the number one priority of our organization because any funding will be decided by sending data about expenses and then voting for a withdrawal.

We will have a blog for our DAO & Token Levblockchain LVE about announcements, decisions and data sent for voting for example : 1 ether withdrawal receipt no231 data= 1ether withdrawal for buying GPU of cost 1eth and details*****.

Public ledger smart contract holding data of profit expenses and then index organization's growth for market quarters by rate.

• New Developers Ecosystem & Community in Greece

Levblockchain LVE Ecosystem's purpose is to successfully create a community of new people and educate them if needed and provide free offices, internet, Hypercomputers and every tool for passionate teams of Blockchain Educators, Hardware technicians, Cloud Networking Technicians, Technology Market analysts, and new Developers - programmers, to grow and expand Levblockchain LVE DAO Ecosystem's projects and invest at other Blockchain based start-ups, this way we achieve helping each other for real and future use of blockchain adoption by Projects made by real physical contribution helping Greek Territorial communities of developers and startups.

Basic developer and technician expenses will be covered so they do not distract attention from education and projects.

Physical book and digital libraries for educational purposes of early-stage developers.
Workspaces for every registered new developer or team.

Registration will take place by Ethereum wallet address of every new-comer at a custom registry smart contract holding ethereum addresses and the time for being working in hour workspace.

Our organization's interest of fostering an open and welcoming environment, we as contributors and maintainers pledge to make participation in our project and our community a harassment-free experience for everyone, regardless of age, body size, disability, ethnicity and expression, level of experience, education, socio-economic status, nationality, personal appearance, race, religion, or sexual gender identity and orientation.

Levblockchain LVE DAO Ecosystem Headquarters are Structured thusly :

- lounge,
 - Bar,
 - Conference room,
 - Private offices,
 - Host rooms.
-
- Will be used for:
 - Public speech,
 - Public project presentation,
 - Public project marketing,
 - Seminars – webinars,
 - Public events.
 - Looking to host our global blockchain community for a direct meet.

• How Will Physical Community Grow And Help the Work-Space of Organization

• Levblockchain LVE community is growing steadily and expanding globally. We are also starting to have a live community in Greece. Our first offices (small offices) in Peiraias City are Re-Designed and will be ready at MAY.

Once our headquarters at Glyfada City are Re-Designed at JUNE we will be there to host:

- teams working on their projects by having the tools needed, even free lunch, coffee.
 - workspace info : 400 s.m. and installation of 20 team offices of 6 people each 5 high end computers for every team's office and a printer (also accessories for support and writing tools)
 - An 10% rate from the final published project will be the profit of our organization from every facilitated team. Also teams will help organization's projects with their knowledge, after their education, if any education is required.
 - Blockchain educators for webinars and physical seminars at a conference room or workspace room, also live education at the main workspace for everyone and for every project.
 - The organization will help subscribed teams for advertising and everything needed for their project to be successful be published working and be useful for future adoption.
 - We will prefer real-life projects adopting blockchain technology and new technology such as A.I. development.
- That does not mean that we will abandon other projects or we will not be supporting them. There it will be a scaling model and growth model by our analysts to see what projects must be published immediately and others wait for to be published.

- ROI macro

● Real-world Problems Solving by Blockchain Adoption

•Levblockchain LVE Ecosystem will Make blockchain's future knowledge and the future projects be mainstream In Greece and real world problem solving.

Many people passionate abandoning because of economical and unsupportive education and crisis life-style, downturn of growth and lack of funding,but fortunately start-ups like our's try to stop that by providing much more than the basics to our physical ecosystem subscribers.

We have already invested in "home-like " properties to facilitate our DAO Ecosystem to provide free offices, internet ,Hypercomputers and every tool for passionate teams of Blockchain Educators , Hardware technicians , Cloud Networking Technicians ,Technology Market analysts and new developers - programmers, to grow and expand Levblockchain LVE DAO ecosystem's projects and invest other blockchain based start-ups for Real-world problem solving Blockchain adoption.

● Investments Strategies & Feature Projects

•The biggest and better investment is to educate new young passionate people and provide them with foundations of knowledge about new technologies and blockchain programming to adopt it for the future and real purpose.

10% from published new projects of new DAOs born in our workspace will be owned by our DAO ,before and after successful project.The rest rate of 90% will be owned by the subscribed Team's DAO (into our workspaces).

•"Green headquarters" and "LOFT"

A grade Solar Panels to help us sustain our facility's power consumption pricing low as much to be also environmental friendly blockchain - mining- network - workspace beside our headquarters already has 200 square meters of trees and plants to also rank it an as "home-like" healthy eco-friendly environment. Natural gas motors for any power drop safety and also good emissions control.

We already are free of rent because we own the start-up's headquarter and we want to expand in the Future to bigger Buildings "LOFT" we also own.

The profits from investments and future projects will absolutely overtake expenses.

Portfolio diversification by adding other asset classes and hedging asset strategies against economic cycles and downturns.

Capital safety and safe revenue every market quarter of the year.

Keeping at least 40% of raised funds in ethereum at our Dao smart contract for safety capital.

Keeping the other 60% of raised funds "LIQUID" and distribute it by our DAO's decisions,further analysis: 25% in ETH and 35% in Dollars and Euros for investing in new projects,buy-backs,markets and safety capital for ongoing expenses.

- Hyper mining rigs at headquarter basement to also help the entire ethereum blockchain to have a sub-point of master nodes in Greek region.

At least 200 High end new tech mining rigs for start and their supportive accessories and we hope to expand another 2000 mining rigs to our secondary "LOFT" facilities in Peiraias

ROI: Macro and market Quarter.

- Developing of a virtual machine to remotely rent our hyper computers power to other organizations.

Our headquarter will have 100 hyper computers (new tech mainframes) for start and then expand another 1000 mainframes to our secondary "LOFT" facilities in Peiraias.

ROI: Macro

- In Greece adoption of blockchain and hyper computers for governmental organizations is not present at the moment so we want to be the first to develop a project like this.

A monthly fee will be the payment of service.

ROI: Macro and market Quarter

- Hypercomputers and tools for our Ecosystem's teams hosted help our future projects for AI. developing in Greece easily adoptable by Greek national developers.

ROI: Macro

- One of our immediate projects at headquarter's basement is to make a start of 25 cyber and physical bunkers 3 square meter per person or per team.

Storing anything Decentralized so anyone with an ethereum wallet address show to the QR code locker's scanner scan his Ethereum address qr code and then unlock the bunker. store in his bunker anything he wants 24/7 anonymously and will be paid by a monthly fee.

ROI: Macro and market Quarter

- We hope to become regulated in Greece because in Greece there are no regulations about crypto and is not illegal, also government announced that tends to adopt blockchain in the future so we want to be the first formal start-up in Greece and become indexed security organization at Greek stock exchange, at this premature Exchange market.

ROI: Macro

• Roadmap

- DAO deployment April
- PreICO deployment May
- Buyback deployment May

Q3 2019

- 1st DAO updates and voting
- Headquarters settling - reconstruction
- Starting operations in headquarter
- Listing on Major exchanges

Q2 2019

- ICO deployment
- Airdrop deployment June

Q4 2019
